The
Sociological
Perspective

Sociology of the Mass Media
July 2, 2007
What is Sociology?

The study of:

(1) Social *behavior* in humans
   (interactions, action in social settings)

(2) Social *relations* among humans
   (e.g. class, race, gender, age)

(3) Social *institutions* created by humans
   (e.g. education, economy, religion)

(4) Social *change* over time
   (how structures evolve)
The Basic Argument

People interact →

People intuitively develop rules of interaction →

Over time and with repetition, people become accustomed to these rules →

The rules become normalized →

People internalize the norms →

The norms begin creating people’s identity

SOC 454/554: Sociology of the Mass Media
What is the “Mass Media?”

Sociology of the Mass Media
July 3, 2007
What are the Media?

“The communication media are different technological processes that facilitate communication between (and are in the ‘middle’ of) the sender of a message and the receiver of that message.”

~Croteau and Hoynes, p. 6-7
Constructing Relationships

People interact →

People intuitively develop rules of interaction →

Over time and with repetition, people become accustomed to these rules →

The rules become normalized →

People internalize the norms →

The norms create people’s identity

SOC 454/554: Sociology of the Mass Media
Institutionalized Relationships

Once norms become internalized, relationships take on a new dimension – they become institutionalized:

Institutions **structure** the nature of our relationships; institutions act as **agents of socialization** and transmit norms across generations.

Within institutions, particular **statuses** and **roles** are recognized, and **conventions** are created that guide appropriate behavior.
Mediating Relationships

All relationships are mediated.

Face-to-face relationships are mediated by symbols, which allow us to form shared meaning.

Institutional relationships are mediated using more sophisticated technologies, which allow for the manipulation of symbols and meaning.
Communication Media

Face-to-Face Communication
Mediated by symbolic elements

Print Media

- Personal Media
  Notes
  Letters
  Post Cards

- Mass Media
  Books
  Newspapers
  Magazines
  Scientific/Professional Journals
  Pamphlets/Brochures

SOC 454/554: Sociology of the Mass Media
Communication Media

Broadcast Media

Personal Media
  Two way Radio

Mass Media
  AM-FM Radio
  Television

Also cable & satellite technologies

Common Carrier Media
  Post Office

SOC 454/554: Sociology of the Mass Media
Communication Media

Broadband Media

Personal Media                  Mass Media

E-mail                          World Wide Web

Each new technology builds on and incorporates elements of previous technologies – e.g. broadcast & broadband both include written text.

SOC 454/554: Sociology of the Mass Media
Functions of the Mass Media

(1) Provider of entertainment
   Books, movies, TV shows, music, games

(2) Producer of information
   Liaison between institutions and people

(3) Creator of technology
   Element of social change

(4) Facilitator of relationships
   Allow people to have more relationships over longer distances
   Open up possibilities for new types of relationships
Functions of the Mass Media

(5) Purveyor of commercialism
    Creates a commercial system and identity

(6) Agent of socialization
    Constructs society
    Teaches youngsters

(7) Social integration
    Creates common worldviews – systems of meaning, values, ideologies, perspectives, perceptions, customs

(8) Check on government
    Watchdog against abuses of power

(9) ?????
Products of the Mass Media

(1) Social stratification
   Legitimation of some groups, marginalization or exclusion of others

(2) Social reproduction
   Perpetuation of dominant social forms, e.g. private enterprise, transnational corporations

(3) Rationalization & bureaucratization
   Demands more systematic, professional relationships

(4) Globalization
   Facilitates global finance, commerce, migration

(5) ????

SOC 454/554: Sociology of the Mass Media
Points to Keep in Mind

(1) There are a diversity of media, each with its own form of operation

(2) Media structure and content change over time, reflecting (a) broader social change and (b) choices by media actors

(3) Media are closely tied to information society and to processes of globalization (communications & transportation are facilitators of globalization)

(4) ?????....
What do the Media Do?

“Today’s journalism is more likely to produce confusion than understanding and informed action.”

~Robert W. McChesney, p. 72
Content
Analysis

Sociology of the Mass Media
July 6, 2007
Content Analysis

Content Analysis is used to collect **quantitative data** for statistical analysis.

Content Analysis quantifies elements of written, spoken or visual text, including words, photos, videos, symbols, or other representations.

Content Analysis has existed for nearly a century, but has not been widely used in the social sciences.

SOC 454/554: Sociology of the Mass Media
Content Analysis

Information is converted to numerical data through a process of coding. The researcher establishes predetermined coding categories and rules, then applies these by systematically assigning numerical codes to concepts in a portion of written, spoken or visual text.
Appropriate Research Questions for Content Analysis

Content Analysis is appropriate for research questions that:

- Look for underlying themes or assumptions in text
- Involve historical or remote texts
- Require a researcher to study large quantities of text

SOC 454/554: Sociology of the Mass Media
Steps in Conducting a Content Analysis

1. Develop a Research Question and Hypotheses
2. Establish a Universe of Information and a Unit of Analysis
3. Establish Variables and Coding Categories
4. Develop Written Coding Rules and a Coding Sheet
5. Draw a Sample of Content
6. Observe Content and Carefully Record Codes
7. Analyze Coded Data and Draw Inferences
8. Present Results

SOC 454/554: Sociology of the Mass Media
Content Analysis:
Sampling

What is the population (or “universe of information”) in content analysis?

What is the sampling element/case (or “unit of analysis”) in content analysis?
Content Analysis: What Can Researchers Code?

(1) Frequency

(2) Direction

(3) Intensity

(4) Space
Content Analysis:
How Can Researchers Code?

(1) Manifest Coding

(2) Latent Coding
Path Dependence

Sociology of the Mass Media
July 12, 2007
SOC 454/554: Sociology of the Mass Media
SOC 454/554: Sociology of the Mass Media
Path Dependence

A method used to study processes of institutionalization. A key element is that once a group, community or society starts down a developmental path, it becomes increasingly difficult to go back to the initial conditions. The decisions made are conceptualized as causal elements to the outcomes.

SOC 454/554: Sociology of the Mass Media
Path Dependence

Analytic Structure of Path-Dependent Explanation

Bureaucratic Organizations

Sociology of the Mass Media
July 13, 2007
Max Weber
(1864 – 1920)
Weber on Bureaucracy

“The development of modern forms of organization in all fields is nothing less than identical with the development and continual spread of bureaucratic administration. This is true of church and state, of armies, political parties, economic enterprises, interest groups, endowments, clubs, and many others. [...] However many people complain about the “red tape,” it would be sheer illusion to think for a moment that continuous administrative work can be carried out in any field except by means of officials working in offices. If bureaucratic administration is, other things being equal, always the most rational type from a technical point of view, the needs of mass administration make it today completely indispensable. This choice is only that between bureaucracy and dilettantism in the field of administration.”

~Economy and Society, vol. 1, p. 223

SOC 454/554: Sociology of the Mass Media
Characteristics of Bureaucracies

(1) Specialization – rigidly defined activities
(2) Hierarchy – roles & supervisory structure
(3) Formal Rules – written rules & sanctions
(4) Technical Training & Competence – product, not person, is what matters
(5) Impersonality – individual is role
(6) Formal, Written Communication – people are interchangeable in roles
The Dark Side of Bureaucracies

(1) Alienation – divorces person from personality
(2) Inefficiency – red tape, justifying position
(3) Inertia – once structure is in place, it perpetuates itself
(4) Oligarchy – concentrates on upper echelons
(5) The Iron Cage – rigid control of one’s identity
Professionalization in Bureaucracies

A professional code of ethics and behavior permeates bureaucracies. Each role has highly specialized, well defined expectations for behavior and output. These require people to conform their behavior and thoughts to the “company line,” which begins to form their identity and personality. New institutions emerge (e.g. schools, courts) that promote bureaucratic thought and action. Through all this, individuals become alienated from their own authentic selves.

SOC 454/554: Sociology of the Mass Media
Professionalization in Journalism

(1) Journalism Schools (Knowledge & Skills)

(2) Separation of Editorial Operations (Creation of Content) from Commercial Affairs (Sustaining the Business)

(3) Establishing Standards (Objectivity, Nonpartisanship, Factual accuracy, Discrediting sensationalism)

(4) Professional Organizations

(5) Oppositional forces (Unions)

SOC 454/554: Sociology of the Mass Media
Products of Professionalization: Values in Journalism

(1) Official sources provide legitimate news
   (And are also fair game for criticism)

(2) Events provide legitimate news
   (Ongoing issues are not news; thus it is not a reporter’s job to provide context)

(3) Business is not a source of legitimate news
   (News can report public relations efforts by business, but cannot scrutinize the operations of business enterprises)
Framing

Sociology of the Mass Media
July 16, 2007
Framing

Framing refers to the set of assumptions that form the foundation of a story. As such, the frame represents the values embedded in the story.

Frequently the frame is more influential in the “take-home message” than the actual content of the story.
Professionalization

An insidious aspect of the development of a professional journalism is that it reallocates responsibilities. Frequently, professionals usurp responsibilities that used to be embedded in communities, and with the responsibility goes power. As bureaucracies grow, people can shift responsibility from themselves to other offices, and thereby avoid negative sanctions; however, at the same time they cloud who is responsible for various outcomes. Thus, the relative input of subjects, writers, editors and owners on any given story is not necessarily clear cut.

SOC 454/554: Sociology of the Mass Media
Framing and Professionalization

Authors use frames to provide a “hook” and to establish the starting point of a story, but editors and owners can influence the framing of a story, either through direct pressure on the writer, or by rewriting the story before publication.

Frames can carry political messages, by incorporating assumptions about the correctness of a political position or viewpoint. As these messages are “hidden” in the text, a seemingly innocuous story can carry a powerful political punch.
Examples of Messages that Can Be Conveyed by Framing

• Free markets are better than government control
• Messages from “official” sources are more legitimate than those from other sources
• Poor people are unreliable, lazy, dishonest, and/or scam artists
• Things that happen in New York and Los Angeles are more important than things that happen elsewhere (especially rural areas)
Hegemony

Sociology of the Mass Media
July 19, 2007
Hegemony

Leadership, power and control, especially dominant control of one elite group over another marginal group.

Exercising influence and dominance through the control of ideas and culture; controlling the frames, worldviews and paradigms of the masses.
Exercising Control

(1) Coercion
Control by command & threat
People comply to avoid sanctions

(2) Cooptation
Control by incentives & enticement
People comply to gain benefits

(3) Conditioning
Control by socialization & internalization
People comply to fit in and live up to expectations
Agents of Socialization

Social institutions, including the mass media, operate as agents of socialization.

Institutions embody the statuses, roles, norms, and values that comprise society and culture. Through socialization into these structures, people internalize these characteristics, and conform to the social system.
Legitimation

Social institutions also produce hierarchies, and tend to legitimate the values of elite groups.

By controlling the very structures of society, elite groups are able to exercise hegemonic control over others, so that subordinate groups buy into and work to support the interests of elite groups.
Forms of Legitimate Authority

(1) Charismatic Authority
   People buy into the claim to authority due to respect for the personal qualities of the leader & owe allegiance to the individual leader

(2) Traditional Authority
   People buy into the claim to authority due to longstanding conventions & owe allegiance to the customary rulers

(3) Rational-Legal Authority
   People buy into the claim to authority due to a belief in the fairness of the rational system & owe allegiance to the legally recognized offices
Technology and Social Change

Sociology of the Mass Media
July 24, 2007
Marshall McLuhan

“The medium is the message”
(or “massage”)

“The new electronic interdependence recreates the world in the image of a Global Village”

_The Medium is the Massage_ (1967), p. 67
Mass Media and Technology

“Like any other extension of man, typography had psychic and social consequences that suddenly shifted previous boundaries and patterns of culture. In bringing the ancient and medieval worlds into fusion – or, as some would say, confusion – the printed book created a third world, the modern world, which now encounters a new electric technology or a new extension of man. Electric means of moving of information are altering our typographic culture as sharply as print modified medieval manuscript and scholastic culture.”

~Marshall McLuhan

*Understanding Media: The Extension of Man* (1964), pp. 171

SOC 454/554: Sociology of the Mass Media
Mass Media and Democracy

“Print technology created the public.
Electric technology created the mass.
The public consists of separate individuals walking around with separate, fixed points of view.
The new technology demands that we abandon the luxury of this posture, this fragmentary outlook.”

~Marshall McLuhan

*The Medium is the Massage* (1967), pp. 68-69
Mass Media and Society

“Socially, the typographic extension of man brought in nationalism, industrialism, mass markets, and universal literacy and education. For print presented an image of repeatable precision that inspired totally new forms of extending social energies. Print released great psychic and social energies in the Renaissance, as today in Japan and Russia, by breaking the individual out of the traditional group while providing a model of how to add individual to individual in massive agglomeration of power. The same spirit of private enterprise that emboldened authors and artists to cultivate self-expression led other med to create giant corporations, both military and commercial.”

~Marshall McLuhan
