

Annotated Bibliography

Assignment: Prepare an annotated bibliography of 5 sources on your research topic.

Process: Visit the library to find journal articles and other material on your topic. Select five articles that help you develop your research design. Your bibliography should include a *complete* and *correct* citation for each article, using an accepted citation format, followed by a brief (2-3 paragraph) synopsis of the article. DO NOT copy the abstract for the article; you should read and summarize the article in your own words. Your synopsis should include a description of the research question, the methods, and the results, as well as your own evaluation of the article.

Submit: An annotated bibliography of these five articles. Each *group* should submit *one* paper.

Due: Oct. 5, 2004.
