

Methodological Approach

Assignment: Prepare a draft of the methodological approach that you intend to use in your proposed study.

Process: Based on your research question, determine which approach and method would be most appropriate. Describe the logic of your research design; in other words, *how* you would go about doing your research? What method will you use? How will you sample and measure? What tools (e.g. questionnaire, interview guidelines) will you develop and use? Explain, in detail, the process of doing your research project.

Submit: A draft of the portion of your proposal in which you describe your methodological approach. This should be approximately 2 to 3 pages. Each *group* should submit *three* copies of their paper.

Due: Oct. 26, 2004
