

Delta State University  
SSC 570: Methods of Social Research  
Spring Semester 2006

## *Annotated Bibliography*

**Assignment:** Prepare an annotated bibliography of 10 sources on your research topic.

**Grade:** 12 points

**Process:** Visit the library to find journal articles and other material on your topic. Select ten articles that pertain to your topic, and that help you develop your research design. You will probably have to look through many articles to select ten that are appropriate to your topic. The articles that you select should help you focus in on a good research question for your proposed study.

**Submit:** An annotated bibliography of these ten articles. Your bibliography should include a *complete* and *correct* citation for each article, using APA format, followed by a brief synopsis of the article. Each synopsis should include a description of the research question, the methods, and the results; notes on how this article contributes to your proposed study; and your own evaluation of the article.

**DO NOT** copy the abstract for the article; you should read and summarize the article in your own words.

**Due:** March 7, 2006
